

JAIKISHAN BAGUL

Software Developer | Python, FastAPI, Laravel, SQL, ETL, Azure, Docker
+91 8830285258 | jaikishanbagul9@gmail.com | github.com/officeboy12242

PROFESSIONAL SUMMARY

Software Developer experienced in backend services, REST APIs, ETL pipelines, database-driven platforms, report automation, and cloud-integrated solutions at BDO India LLP. Hands-on with Python, FastAPI, Laravel, MySQL, PostgreSQL, SQLAlchemy, Pandas, NumPy, Pydantic, Azure Blob Storage, Docker, CI/CD, API integration, performance optimization, validation, security, and Agile delivery.

TECHNICAL SKILLS

Languages: Python, PHP, SQL, JavaScript, HTML, CSS

Backend & APIs: FastAPI, Laravel, REST APIs, CRUD services, Pydantic, SQLAlchemy, Swagger, Postman

Data & Databases: MySQL, PostgreSQL, ETL pipelines, Pandas, NumPy, query optimization, large-scale data processing

Cloud & DevOps: Azure Blob Storage, Docker, CI/CD, Git, deployment support, cloud storage integration

Practices: Agile/Scrum, API integration, performance optimization, data validation, security enhancement, report automation

PROJECTS

WA-BOT | JavaScript, Node.js, Baileys, MongoDB, Docker, Render | github.com/officeboy12242/WA-BOT

- Built a WhatsApp multipurpose bot for free-course posting, movies, Instagram downloads, stickers, tech news, GitHub trending

digests, moderation, MongoDB-backed sessions, Docker setup, and Render deployment.

Free Udemy Courses Bot | Python, Telegram Bot API, SQLite, yfinance, Pandas, Render | github.com/officeboy12242/Free-udemy-courses-bot

- Developed a Telegram bot for free/discounted course posting with SQLite duplicate tracking, Render healthcheck/dashboard

endpoints, market JSON APIs, and yfinance/Pandas-based dip alerts.

PROFESSIONAL EXPERIENCE

Software Developer Executive | BDO India LLP

Sep 2023 - Present (2026)

2026 - Present

- Continuing backend development across Python FastAPI, REST APIs, ETL workflows, SQL optimization, validation, security, and production support.

2025

- Optimized SQL queries and backend processing for high-volume datasets, including workloads with 1+ crore records.
- Automated reporting and data extraction workflows to reduce manual effort and improve stakeholder turnaround time.

2024

- Developed FastAPI services, CRUD modules, ETL pipelines, Azure Blob Storage integrations, Docker-based deployments, and CI/CD-supported release workflows.

Sep 2023 - Dec 2023

- Built and maintained backend APIs using Python, SQLAlchemy, Pandas, Pydantic, and database-driven workflows for business applications.

Software Developer Executive | BDO India LLP

Jan 2023 - Jul 2023

- Built and enhanced Laravel and MySQL modules for internal platforms, including database schema design, backend logic, and user-facing workflows.

- Implemented third-party API integrations and data exchange workflows to connect application modules with external services.

- Developed RESTful endpoints, validation flows, deployment support, stakeholder demos, user training, and report generation.

Software Developer Intern | BDO India LLP

Jul 2022 - Dec 2022

- Supported Azure Blob Storage implementation and migration scripts for application document handling and cloud-based storage workflows.

- Created 30+ customized reports and data extracts using SQL and backend scripting to support business reporting requirements.

- Assisted FastAPI migration and wrote Python, SQLAlchemy, Pandas, validation, transformation, and migration scripts.
